

# RECEIVE FINNISH EDUCATION GLOBALLY

Bringing online courses in clean tech, health care and teacher training to you at your office or home

Improve your professional skills with high quality online courses from Finland's top universities. All courses are provided by Finnish universities and are created in a close cooperation to guarantee outstanding quality.

## Target Groups

Our courses are for students at colleges or universities studying the offered subjects as part of their degree studies, for corporate employees in need to improve their skills in desired topics and for individuals as further education for a new position at work or to increase knowledge in a specific matter.

## Courses

There are two types of courses on the Online University of Finland: short and free Open Courses to introduce you to a topic and facilitated Premium Courses making you a certified expert in a specific field against a fee.

## Open Courses

Open Courses are ideal for individual learners and are free to join at any time. Participants learn easily and efficiently by themselves through watching videos, analysing images, reading documents and completing quizzes on various subjects. Each Open Course takes up to 2 hours to complete.

## Premium Courses

Premium Courses suit best for participants who want to become experts in a given field. Premium Courses follow a course plan including e.g. weekly assignments in groups or individually. In addition to more videos, images and documents, the course material includes case studies and presentations. The learning includes as well live sessions in virtual classrooms, individual and group assignments, and information exchange between the participants. Each participant gets support from facilitators and peer participants. The participants are evaluated through the course participation and assignments.

Durations of Premium Courses are indicated in ECTS (European Credit Transfer System, 1 ECTS = 25 - 30 hours of studying). Premium Courses are between 1 and 5 ECTS, i.e. 25 - 125 hours.

A certificate of completion is provided by the offering university for each successfully passed course.

## Learning Method

Learning at the Online University of Finland focuses on the social aspect of learning. Participant learn together with others and under the guidance of a course facilitator in a group. According to recent statistics the Premium Courses provided by our university partners are being completed by over 90 percent of the participant.

## Subjects

Online University of Finland concentrates on the subjects where Finnish universities are among the best in the world. Currently online courses are offered in clean tech and pedagogy / teacher training. We are developing courses also in health care, nursing and forest science.

If our courses do not include courses you would like take, please contact us and let's find you the most suitable courses.

## Language

Course materials are originally in English and can be localised by the local partners.

## Learning Environment

All courses are implemented and carried out in the Learning Management System operated by the Online University of Finland under <http://moodle.ouof.org/>.

Our learning environment offers a modern and easy to use interface, personalised dashboard, collaborative tools and activities, and calendar among many other practical tools for both course participants and teachers.

## Price

Open Courses are free for everyone to enrol to. Premium Courses have a fee. Please contact us for more information.
